

UPCOMING WEBINAR

Scalable, Accessible Single Cell with Parse Biosciences' Evercode

Single cell RNA-Seq has become a required tool in today's genomics research. Droplet-based approaches are effective, but struggle against flexibility, high costs, and scale.

In this webinar, you'll learn how Parse Biosciences' Evercode technology can streamline your research and help you conduct scalable single cell with no instrument required. Register below to secure your spot!

Wednesday, May 14

12:00 - 1:00 PM CT
