

Biotechnology Commercialization Center

The Biotechnology Commercialization Center (BCC), located at The University of Texas Health Science Center at Houston (UTHealth), is available for incubation of startup companies. The 15,000+ square-foot center's mission is to help facilitate the next breakthrough in the diagnosis or treatment of disease by providing office, laboratory and conference space, as well as access to UTHealth equipment and core analytical facilities. Additionally, the BCC's proximity to other institutions in the Texas Medical Center provides valuable access to information, collaboration and expertise.
