The CCTS Biobank is your resource for:

- biological samples and associated data to
  - help jump-start your research
  - provide preliminary data for funding proposals
  - provide the large numbers of samples and data sets needed for your research project
  - provide the types of samples and related data needed to study a particular disease or health condition

- guidance on informed consent documents for future research use and sharing

- facilitating biological sample and data sharing among our research community while maintaining institutional and governmental compliance

- letters of support indicating your collaboration with the CCTS Biobank and our resources to help support your research for your funding proposals

For more information about the CCTS Biobank, contact the program manager at: UTHealth_CCTS_Biobank@uth.tmc.edu

For more information about this study, contact the principal investigator and CCTS Biobank Director, Dr. Jennifer Sanner, at: Jennifer.E.Sanner@uth.tmc.edu or 713-500-2114.
