NIH Public Access Policy

Topics:
- Refresher of the NIH Public Access Policy
- What’s New
- Review NIH Notices
NIH Public Access Policy

What is the NIH Public Access Policy

- Consolidated Appropriations Act, 2008
  - Ensures that the public has access to the published results of NIH funded research.
  - Requires scientists to submit final peer-reviewed journal manuscripts that arise from NIH funds to PubMed Central, upon acceptance for publication.
  - Requires papers be freely accessible to the public on PubMed Central no later than 12 months after the date of publication.
  - Beginning May 25, 2008, applications, proposals or progress reports to the NIH must include the PMC or NIH Manuscript Submission reference number when citing applicable articles that arise from their NIH funded research.
The Policy Applies to Any Paper that:

- Is peer-reviewed; and,
- Is accepted for publication in a journal on or after April 7, 2008; and, arises from:
  - Any direct funding from an NIH grant or cooperative agreement active in Fiscal Year 2008 or later, or,
  - Any direct funding from an NIH contract signed on or after April 7, 2008, or;
  - Any direct funding from the NIH Intramural Program, or;
  - An NIH employee.
NIH Public Access Policy

How Awardees Comply:

Address Copyright:

Institutions and investigators are responsible for ensuring full compliance with the Public Access Policy (e.g., that any publishing or copyright agreements are consistent with submitting to PMC).

Deposit Paper Upon Acceptance for Publication

• Method A: Publish in a journal that deposits all NIH-funded final published articles in PMC without author involvement.

• Method B: Make arrangements to have a publisher deposit a specific final published article in PMC.

• Method C: Deposit the final peer-reviewed manuscript in PMC yourself via the NIHMS.

• Method D: Complete the submission process for a final peer-reviewed manuscript that the publisher has deposited via the NIHMS.

Cite Article

• Include the PMC number (PMCID) for applicable papers in applications, proposals and reports, as described at http://publicaccess.nih.gov/citation_methods.htm.

• eRA Commons Users Can Now Generate a Publications Report for the PHS 2590 with My NCBI - NOT-OD-13-017
NIH Public Access Policy

Upcoming Changes to Public Access Policy Reporting Requirements and Related NIH Efforts to Enhance Compliance - NOT-OD-12-160

- NIH encouraging compliance with the NIH Public Access Policy
- Effective with the mandatory use of the RPPR Spring 2013, NIH will delay processing of non-competing continuation grant awards if publications arising from that award are not in compliance with the NIH public access policy.
- The award will not be processed until recipients have demonstrated compliance.
- RPPR reports submitted with non-compliant publications will need to provide a response.
The release of the Public Access Compliance Monitor

Web-based tool that institutions can use to track compliance of publications that fall under the NIH Public Access Policy

The NIH estimated the overall compliance with the NIH Public Access Policy is about 75%.

UTHealth’s current compliance rate is 73%
NIH Public Access Policy

eRA Commons Users Can Now Generate a Publications Report for the PHS 2590 with My NCBI - NOT-OD-13-017

- Expected with the release of the RPPR in spring 2013, for PHS 290 progress reports My Bibliography in My NCBI can now generate a PDF report of publications that may be printed and submitted as Section 2.2.6, Section E. Publications, of the paper PHS 2590 progress report.

- Available for use now but will be mandatory for PHS 2590 for all Streamlined Non-Competing Award Process (SNAP) and Fellowship awards, expected in the Spring of 2013.

SciVal

Jodi S. Ogden, MBA, CRA
Assistant Vice President
Sponsored Projects Administration
SciVal

• UT System negotiated contract on behalf of all UT health institutions
  – Contract provides for SciVal Experts and SciVal Funding
  – System pays for years 1-2, institutions pay for years 3-5

• MDACC and UTHSCSA currently use SciVal
  – UTHealth is working with those institutions to learn best practices
SciVal Funding

• Provides recommendations for funding opportunities that match faculty expertise
  – Includes all federal agencies, private foundations, corporations, and international agencies (over 2800 funding agencies in North America alone)
  – Sends email alerts to prevent missed chances
  – Educates faculty about new funding programs

• Suggests potential collaborators for grants

• http://www.funding.scival.com/search?preSearch=#b
SciVal Experts

• Provides a directory of research expertise
  – Uses specific criteria to search for experts
  – Enables collaboration between institutions and organizations
  – Downloadable data for further analysis
• Provides faculty profiles
  – Prepopulated publication histories from Scopus
  – Drill-downs on publications, grants, research trends, similar experts, etc.
  – Visual “fingerprint”
SciVal Status Report

- UTHealth currently working with Elsevier (parent company) to set basic configuration around our SciVal Experts site
- SciVal Funding will be available within the next 3-4 weeks
  - Access available to all faculty/staff
  - Will establish a list of “power users” at each school, in central administration, and at libraries
- Currently developing a schedule for training and communication
