Information Gathering Methods

Current Students and Alumni

Student Perception Survey:

Triennial survey of current students. (scheduled for 20010) A self-administered internet based survey sent to assigned student email accounts. This is a 193 question survey designed to assess satisfaction with the full spectrum of the student experience. The subject matters ranges from academic questions to the physical plant to student support services. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups. Response rate = 31.0% (1131 responses received from 3651 students (2007)). *This study is scheduled for Fall of 2010*

Dental Branch Alumni Survey (Doctor of Dental Surgery)

Annual survey of D.D.S. Alumni stratified into three cohorts based on 1, 5 and 10 years from graduation. A self-administered survey mailed to alumni based on latest available address information. This is a 102 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSC-H. Further, the survey collects baseline information on current employment, current practice type, income, preparedness for practice by the academic program and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups.
2010: Response rate = 26.2% (71 responses on 271 D.D.S. graduates).

Bachelor of Science in Nursing Alumni Survey

Biennial survey of B.S.N. Alumni stratified into three cohorts based on 1, 5 and 10 years from graduation. A self-administered survey mailed to alumni based on latest available address information. This is a 57 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSC-H. Further, the survey collects baseline information on current employment, employment setting, current specialty, current nursing role, preparedness for professional licensure examination, and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups.
2009: Response rate = 27.4% (94 responses on 343 B.S.N. graduates).

Bachelor of Science in Nursing Employer Survey

Biennial survey of B.S.N. Employers. A self-administered survey delivered by the respondents to their employers. This is a 24 question survey designed to collect baseline information on employer perceptions of B.S.N. alumni job abilities, job performance, employment setting information and employer personnel needs.
2009: Response rate = 6.1% (21 responses on 343 B.S.N. graduates).

Master of Science in Nursing Alumni Survey

Biennial survey of M.S.N. Alumni stratified into three cohorts based on 1, 5 and 10 years from graduation. A self-administered survey mailed to alumni based on latest available address information. This is a 48 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSCH. Further, the survey collects baseline information on current employment, employment setting, current specialty, current nursing role, income, involvement in research, and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups. 2009: Response rate = 21.9% (59 responses on 270 M.S.N. graduates).

Master of Science in Nursing Employer Survey

Biennial survey of M.S.N. Employers. A self-administered survey delivered by the respondents to their employers. This is a 11 question survey designed to collect baseline information on employer perceptions of M.S.N. alumni job performance and knowledge, employment setting information and employer personnel needs. 2009: Response rate = 10.4% (28 responses on 270 M.S.N. graduates).

School of Public Health Alumni Survey

Annual survey of School of Public Health Alumni stratified into three cohorts based on 1, 5 and 10 years from graduation. A self-administered survey mailed to alumni based on latest available address information. This is a 59 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSCH. Further, the survey collects baseline information on current employment, employment setting, current specialty, income, involvement in research, and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups. 2010: Response rate = 20.2% (38 responses on 188 School of Public Health graduates).

Medical School Alumni Survey

Annual survey of Medical School Alumni stratified into two cohorts based on 5 and 10 years from graduation. A self-administered survey mailed to alumni based on latest available address information. This is a 83 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSCH. The survey also collects baseline information on current employment, employment setting, current specialty, income, involvement in research, and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups. As of 2009 the Medical School elected to discontinue their alumni survey. 2008: Response rate = 37.1% (135 responses from 364 Medical School graduates).

School of Health Information Sciences Alumni Survey

A survey of all graduates of the School of Health Information Sciences, this survey is not stratified into graduating year classes due to the short period of time the School has been in existence and small graduating class size. The survey is a self administrated survey conducted on-line. This is a 63 question survey designed to assess satisfaction with the academic experience during the respondent's time at the UTHSC-H. The survey also collects baseline information on current employment, employment setting, current specialty, income, involvement in research,

and professional development. Demographic variables are collected and statistical analysis is performed to test for significant differences among groups.

2008: Response rate = 46.3% (44 responses from 95 SHIS graduates).

Patients

Patient Satisfaction Survey

Ongoing assessment of satisfaction with all aspects of the patient experience for patients of the UT Physicians (UTP), the non-profit practice plan for physicians at the University of Texas Health Science Center at Houston. This is a 19 question self-administered survey covering appointment making, registration, help with financial and insurance concerns, helpfulness of the medical staff, privacy and overall experience. The survey is implemented across 30 clinics located in Houston and the Houston metropolitan area.

2010: A total of 248 completed surveys were completed online for this analysis

Analysis of Findings

Results of the various assessments are reviewed through various institutional channels including institutional and individual school level bodies.

Student Perception Survey: Scheduled for implementation in Spring 2010. The results were discussed and considered through institutional channels. The survey was placed entirely on-line in 2004 and will again be implemented on-line. Items for review included availability of parking, and the mandatory health insurance plan.

Medical School Alumni Survey: Issues raised in this survey included debt counseling, availability of scholarships and preparation for managed care.

School of Nursing BSN Alumni Survey: Issues raised in this survey included increasing clinical practicum time, technology training, and management concept training.

School of Nursing MSN Alumni Survey: Graduates were generally very satisfied with the preparation they received through their perceptorships and clinical courses.

School of Public Health Alumni Survey: Issues raised in this survey included the availability of upper level courses, and the effectiveness of ITV course at remote sites.

Dental Branch Alumni Survey: Graduates were generally very satisfied with the curriculum at the Dental Branch, and felt very competent in their abilities at graduation.

School of Health Information Sciences: Issues raised in this survey include the availability of financial aid and scholarships. Issues were also raised concerning the availability of research and library facilities.

Patient Satisfaction Survey: Issues raised in this survey include availability and cost of parking, and ease in renewing prescriptions.
