Delivering Innovative Solutions for the Future

The University of Texas Health Science Center (UTHealth) is recognized internationally as one of the world’s great research universities. UTHealth connects research, education, patient care and service in bold, innovative ways. Basic scientists and clinical researchers from all disciplines work together to deliver innovative solutions that realize the best hope for a healthier future.
Office of Research

Research Service Centers

UTHealth encourages the development of collaborative relationships among faculty around research and academic mission-related interests. To that end, UTHealth enables academic departments, schools, and the university itself to establish fee-for-service research service centers ("RSC"), and other research facilities and services for specific purposes in pursuit of these missions. To learn more about the policies governing the development and administration of RSCs, see Development and Administration of Research Service Centers.

To obtain a comprehensive set of everything about Research Resources at UTHealth, please see UTHealth Research Resources Brochure.

To learn more about UTHealth's Shared Research Resources, make a selection from the list below or scroll down to see descriptions and contact information:

- Atomic Force Microscopy Facility
- Biostatistics & High Performance Computing Service Center
- Biomedical Informatics
- Center for Advanced Microscopy
- Center for Laboratory Animal Medicine & Care (CLAMC)
- Center for Research in Laboratory Animal Medicine & Care (CLAMC)
- DNA Sequencing and Genotyping Core Lab
- Flow Cytometry Service Center
- Transgenic & Stem Cells Service Center
- McGovern Medical School - Histology Lab
- Clinical & Translational Pharmacology Service Center
