Delivering Innovative Solutions for the Future

The University of Texas Houston Health Science Center (UTHealth) is recognized internationally as one of the world's great research universities. UTHealth connects research, education, patient care and outreach in bold, innovative ways. Basic scientists and clinical researchers from all disciplines work together to deliver innovative solutions that create the best hope for a healthier future.

Research Service Centers

UTHealth encourages the development of collaborative relationships among faculty around research and academic mission-related interests. To that end, UTHealth enables academic departments, schools, and the university itself to establish fee-for-service research service centers ("RSC"), and other research facilities and services for specific purposes in pursuit of these missions. To learn more about the policies governing the development and administration of RSCs, see [Development and Administration of Research Service Centers](#).

To download a comprehensive pdf containing information about Research Resources at UTHealth, please see our [UTHealth Research Resources Brochure](#).

To learn more about UTHealth's **Shared Research Resources**, make a selection from the list below or scroll down to see descriptions and contact information.
